Professional Summary

B.Tech. Computer Science and Engineering graduate specializing in AI/ML, with hands-on experience building LLM and RAG-based applications, including a retrieval-augmented legal chatbot and an AI-assisted lab management system. Proficient in Python and modern AI/ML tooling, with additional full-stack software engineering experience across backend, frontend, and database development.

Technical Skills

AI/ML & GenAI	NLP, Transformers, LLMs, Generative AI, RAG, Embeddings, FAISS, DistilBERT, LLaMA-3, SentenceTransformers
Programming	Python, C/C++, C#, Java, JavaScript (ES6+), TypeScript, SQL
Frameworks & Backend	React.js, Node.js, Express.js, Flask, ASP.NET, Entity Framework, REST APIs
Databases & Tools	PostgreSQL, MongoDB, MySQL, Git, JIRA, Cypress

AI/ML Projects

Assesly.AI – Intelligent Lab Management System

Python, PostgreSQL, React.js, Node.js, LLMs

- Developed an AI-driven system to generate personalized lab questions and automate student assessments.
- Integrated an LLM-based evaluation pipeline to improve grading efficiency and consistency, alongside faculty and student dashboards for lab scheduling, submissions, and progress tracking.
- Built REST APIs to enable seamless frontend-backend communication.

FIR-LegalConnect – AI-Powered Legal Chatbot

Python, Flask, FAISS, SentenceTransformers, DistilBERT, LLaMA-3

- Developed a chatbot using RAG architecture with FAISS and LLaMA-3 to retrieve relevant BNS legal sections and generate contextual replies.
- Integrated DistilBERT to classify valid legal queries and used precomputed embeddings to improve response time, achieving approximately 80% retrieval accuracy.
- Exposed the system via a lightweight Flask REST API.

Work Experience

Cognizant – ADM Trainee

Feb 2026 – present

C#, ASP.NET, Entity Framework, SQL

- Worked on a Construction Site Management system, building RESTful APIs and MVC-based modules for role-based access, scheduling, and reporting.
- Designed and managed relational databases using SQL, and strengthened full-stack development skills across backend (.NET, C#), frontend (MVC views), and database layers.

The Sirius Academy – Frontend Developer

June 2024 – Feb 2025

React.js, Node.js, Express.js, TypeScript, MongoDB

- Built a Lesson Management module with CRUD functionality, interactive question types (MCQs, True/False, sequence), and image upload.
- Collaborated in an Agile remote team using REST APIs, Git, and Cypress; reused components across modules to reduce redundancy.

Education

Amity University, Noida

2022 – 2026

B.Tech. in Computer Science and Engineering, Specialization in AI/ML

CGPA: 7.83

Certifications & Achievements

- 1st Position, SPOOKTOBER FEST
- NPTEL – Python for Data Science
- NPTEL – Joy of Computing using Python
- Certified System Administrator, ServiceNow
